

Model 03-206

Pro-MAM BR Mammography Phototimer Test Plates - 6.2 cm

Part Number: 99-9985

Introduction

The Model 03-206 Pro-MAM BR Mammography Phototimer Test Plates are designed for accurate assessment of AEC system performance in accordance with American College of Radiology and MQSA recommendations. Unlike acrylic, these testing slabs are manufactured with very tight thickness tolerances and more accurately simulate real breast tissue over the range of energies used in mammography. The Pro-MAM BR (50% glandular / 50% adipose) is most commonly used.
